JUPITER

JUPITER

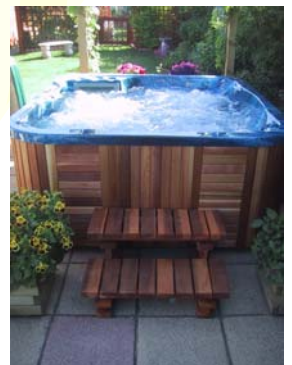

A delightful **deep deluxe hot tub** for your own home or garden.

The Jupiter range offers the ultimate hot tub experience. Seating six to seven people with ease, the Jupiter range offers the perfect place for a family party or for entertaining friends, with plenty of space for everyone! These deep deluxe models offer even the tallest of people comfortable up-to-the-neck hydromassage. With a craftsman-built cedarwood cabinet and fitted sculpted headrests on all models, the Jupiter range provides the highest quality deep deluxe hot tub experience for a range of budgets.

The Minerva, with 22 luxury hydromassage jets, runs on a standard 13-amp supply, and offers an opportunity to enjoy a deep deluxe tub for a price equivalent to that of a much smaller model. Add an air blower and 16 bubble injectors to the Minerva, and the Juno offers you the benefits of dual hydro and air massage at an affordable price, still running on a standard 13-amp supply.

The top of the range luxury Jupiter really is the 'all-singing all-dancing' model for the serious hot tub bather, with a total of 57 hydromassage jets, including two adjustable neck jets. The Jupiter is equipped with three powerful water pumps, an air blower and a top-of-the-range digital control system, runs on a 30-amp supply and offers the ultimate luxury with real value for money.
