

Oracle

Aerodynamic 8" top rails are curved to follow the radius

shape of the pool just as you would expect from an equivalent resin pool. This gives far greater aesthetics to your pool and garden.

The Garden Leisure Oracle brings together human creativity and computer accuracy to create the most advanced design in above ground pools. The components are carefully crafted using the latest materials and Vinyl Plexi-Coat finishes, which results in a product that performs as well as it looks for years to come. The Oracle provides the perfect backdrop for the lifestyle you deserve.

The Oracle has a pool wall depth of 52" giving you the most swimming freedom.

Another predominant feature is the Space Saver Oval System which means an oval Oracle is perfect for the smallest of gardens.

Oracle Above Ground Pool - 52"

The Oracle offers

- Stainless Steel Hardware
- Aerodynamic 8" curved top rails to follow the radius shape of the pool, gives far greater aesthetics to your pool and garden
