

Easy Pool Fence

Plastica Pool & Pond Rollaway Fence

ROLLAWAY FENCE

Plastica Rollaway Fence is a fully removable fence for keeping children and pets away from swimming pools and ponds. It is made from exceptionally strong plastic coated polyester mesh fixed to sturdy aluminium uprights which slot into ground fixings. Plugs are supplied to cover the open holes when the fence is removed.

Pool & Pond Rollaway Fence comes in a variety of modules, each with 1m sections, the net height is 1.2m. Sections can be joined together with special connectors and ground fixings are available for either concrete/paving or grass/soil. When removed, the fence rolls up into a neat, lightweight package for easy storage.

The rollaway fence is supplied as standard fences in stated length with posts every metre. They are supplied with the appropriate number of ground sleeves suitable for concrete, caps for the sleeve and 1 connector hook.

The fence units are fully compliant with AFNOR NF P90-306, the French standards for safety barriers and must be used in conjunction with self closing gates which are available as either in-ground or surface mount.

For grass/soil fixing you will need to purchase one galvanised ground stake per post (see extras for details)
