

## THE PEARL RANGE

In 2018 Aquaflex quietly introduced a new type of patterned liner material. “Mosaic Wave” was the first of the exciting new Pearl range of patterns and has proved to be so popular that we have expanded the range to more glistening patterns. The Pearl range provides a gleaming shimmering effect, using specially formulated pearl effect pigments. These reflect the light in unpredictable ways, giving a sparkling character to the whole pool.

The Pearl liners create a timeless jewel-like effect being the perfect answer for those seeking to add an element of drama and brilliance to their swimming pool environment.

“Butterfly Blue” and “Butterfly Grey” complement “Mosaic Wave” to bring the Pearl Range together as the most enticing new range of patterns for swimming pool liners to arrive for many years.
