Water Treatment Products

Clarity pH Plus Granules

pH Plus Granules effectively increase the pH level of the pool water. Add 100g per 10m³ to raise pH value by 0.1.

The pH of pool water affects swimmer comfort and sanitiser efficiency. The recommended level for pH is 7.0 – 7.4. This is the optimum range that will allow chlorine sanitisers to work efficiently, protect the pool equipment and surfaces and create the most pleasant swimming conditions. Always ensure that the total alkalinity is checked and adjusted if required before adding pH balance chemicals.

Application

Check the pH level on a weekly basis (private swimming pools) with test strips or an electronic pool tester. If the pH level is too low, increase to 7.0 – 7.4. To increase the pH by 0.1, add 100 g of pH-Plus for 10 m³. Gently pour the product directly into the water around the perimeter of the pool with the pump and filter running with no swimmers in the pool. NOTE: Check the Total Alkalinity and adjust if required before using pH-Plus Granules.

Pack Sizes

CL003 1kg (available in a box of 12 x 1kg)

CL004 5kg bucket (available in a box of 2 x 5kg)

Warning

H319 Causes serious eye irritation.

P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P280 Wear protective gloves/eye protection.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P308 + P311 IF exposed or concerned: Call a POISON CENTER/doctor.

P501 Dispose of contents/container to an approved waste disposal plant.

Do not mix with other chemicals. Do not swallow.
